Top U.S.-Based Paint Suppliers

The paint supply goes to architectural and decorative use as well as non-architectural applications such as automotive, wood, protective, industrial, marine and more. Company size can be an important indicator of its success, its ability to meet customer needs, and also of its flexibility to offer the types of products and services needed. Table 1 below contains a list of top paint supply companies in the United States. Annual sales are in millions of U.S. dollars. Dashes indicate where data was unavailable. Also shown in the table is the company location (city, state), the year in which the company was founded, and the company size as reflected by the number of employees.
